How does the county commission make my life better?

The Putnam County Commission saved my dad's life before. They have made it easy to go relax at Valley Park in the clean environment. The county commission has made me want to have a dog from the animal shelters. I appreciate the county commission for the work that they do.

The Putnam County Commission provided the paramedics that saved my dad. One day my mom woke up and found him lying on the floor. So, she called the ambulance and they arrived at my house loaded my dad and drove to the hospital. He eventually recovered from the mini stroke. If it wasn't for the paramedics, my life would have been ruined.

The Putnam County Commission gave me access to Valley Park to relax and play. Going to Valley Park with my mom is fun. We used to go to the pool and jog on the sidewalks. When we had my dog, we used to take him to the Valley Park dog park and he loved it. Without the county commission the Valley Park wouldn't exist.

The Putnam County Commission made it possible to have the greatest dog I have ever owned. We got him from the animal shelter and we named him Georgia. Georgia was a Boston terrier off the movie "Hotels for Dogs". I really like that dog and so my mom and dad got me one just like it. That dog was the best thing that ever happened to me I had her since I was six. She was obedient, lovable, and lazy. If the County Commission didn't give us animal shelters, then I would have never had Georgia.

The Putnam County Commission has made my life a lot more interesting and fun. I was able to have the best dog ever and I was able to go relax at Valley Park. My dad was able to make a full recovery in the hospital thanks to the county commissions. Finally, The Putnam County Commission has made it possible for me to go hang out with friends at the Putnam County Fair. I'm very thankful that our county commission gives us these opportunities to have these places for us kids and adults to visit.
